Professional Summary

DevOps Engineer with 6+ years designing, automating, and operating large-scale, multi-cloud infrastructure in **AWS**, **GCP**, **Azure**, and **Oracle Cloud**. Expertise in **Cloud Architecture**, **Infrastructure as Code**, and **Operational Excellence** across highly regulated environments. Strong background in **Kubernetes**, **automation**, **monitoring**, and **cost optimization**. Certified **AWS Solutions Architect Professional** with proven ability to design secure, resilient, observable, and scalable CloudOps platforms enabling high availability, reliability, and DevOps alignment.

Technical Skills

Languages: Spanish (Native), English (Proficient)

Programming: Bash, Python, Node.js, TypeScript, Java

Cloud Platforms: AWS, Azure, GCP, Oracle Cloud

CloudOps & DevOps: Terraform, AWS CDK, Docker, Kubernetes, Jenkins, GitHub Actions, Azure DevOps, Harness, Linux, Git, CI/CD Automation, Observability, Grafana, Prometheus, Datadog, SRE Practices

Security & Networking: IAM, VPC Design, Load Balancers, Private Networking, Route53, Cloud Governance, Compliance, Encryption, High Availability, DR/BCP, Well-Architected Framework

Certifications: AWS Solutions Architect Professional, AWS Solutions Architect Associate, AWS Developer Associate, AWS Cloud Practitioner, Oracle Cloud Certified (x6)

Professional Experience

Staff Software Engineer / Platform

Visa

Dic 2025 – Current

- Architected and operated mission-critical, high-volume cloud platforms with emphasis on **reliability**, **security**, and **observability**.
- Led CloudOps modernization initiatives across **GCP and AWS**, improving scalability and operational resilience.
- Designed **multi-region, container-based architectures** using GKE, EKS, and service meshes for secure communication.
- Improved deployment reliability and release velocity through CI/CD optimizations and standardized cloud governance.
- Built operational automation for failover, capacity management, and incident response, reducing MTTR and manual toil.
- Mentored engineers in cloud architecture patterns, SRE principles, and infrastructure automation.

Technologies: GCP (GKE, CloudSQL, IAM, Monitoring), AWS (EKS, ECS, Lambda, EC2, Fargate, Route53, Batch), Terraform, Grafana, Python, Java, Spring Boot.

CloudOps Engineer

Simetrik

May 2025 – Oct 2025

- Automated CloudOps workflows using **Harness Platform**, enhancing operational efficiency and deployment reliability.
- Managed **production-grade EKS and ECS clusters**, ensuring resilience, scaling policies, and workload observability.
- Implemented **IaC governance** and guardrails with Terraform modules and cloud policy enforcement.
- Improved cloud cost governance using AWS Trusted Advisor, usage analytics, and workload rightsizing.

- Automated incident response and operational tasks via Python and Bash, reducing manual intervention.

Technologies: Harness, AWS (EKS, ECS, Lambda, EC2, Fargate, Route53, Batch), Terraform, Datadog, Doppler, Bash, Python.

Cloud/DevOps Engineer

Globant

Apr 2022 – May 2025

- Designed and implemented **multi-account AWS architectures** for enterprise-grade mobile and backend platforms.

- Led CloudOps initiatives incorporating HA, DR, monitoring, cost optimization, and automated deployments.

- Standardized infrastructure using **Terraform, AWS CDK, and CloudFormation** across all cloud environments.

- Built and maintained CI/CD pipelines with **Jenkins**, accelerating release processes by 60%.

- Developed **observability dashboards** and root cause analysis workflows with CloudWatch and X-Ray.

Technologies: AWS (EC2, ECS Fargate, DynamoDB, Aurora RDS, Lambda, SQS, SNS, CloudWatch, X-Ray, VPC), Jenkins, CDK, CloudFormation.

DevOps Engineer / Cloud Architect

Banco de Bogotá

Jan 2022 – Apr 2022

- Designed secure and scalable cloud architectures following AWS Well-Architected Framework pillars.

- Automated infrastructure provisioning and CI/CD workflows using GitHub Actions and Terraform.

- Supported the migration from legacy workloads to Kubernetes and container-based microservices.

- Ensured governance, observability, and SRE-aligned operational readiness for cloud applications.

Technologies: AWS (ECS, Lambda, API Gateway, CloudFront, Route53), Terraform, Docker, Linux, Git, GitHub Actions.

Cloud Engineer

Oracle

Nov 2020 – Jan 2022

- Designed and delivered **cloud architectures** and PoCs for enterprise customers on Oracle Cloud.

- Automated provisioning through Terraform, improving standardization and reducing provisioning time.

- Built CI/CD pipelines using Jenkins and Azure DevOps for cross-cloud deployments.

- Managed Docker and Kubernetes workloads across hybrid environments.

Technologies: Oracle Cloud (IaaS, PaaS), Terraform, Jenkins, Azure DevOps, Docker, Kubernetes.

System Service Representative

IBM

Apr 2020 – Nov 2020

- Operated cloud and middleware workloads via Azure DevOps pipelines and automated IaC provisioning.

- Improved system reliability by implementing monitoring, incident response, and operational runbooks.

- Supported multi-OS environments including Linux and AIX.

Technologies: AWS, Azure DevOps, Linux, AIX, Windows.

Developer I

Tekbees

Feb 2020 – Mar 2020

- Developed and maintained Node.js backend services deployed on AWS and Google Cloud.

- Containerized applications using Docker and integrated them into CI/CD workflows.

Technologies: AWS, GCP, Node.js, Vue.js, React Native, Docker.

Developer

GITEI Research Group

Sep 2019 – Dec 2019

- Built and deployed cloud-based educational applications using AWS.

- Maintained Ubuntu-based server infrastructure.

Technologies: AWS, Ubuntu OS.

Cloud Architect Jr

IBM

Aug 2018 – Aug 2019

- Designed enterprise cloud architectures on IBM Cloud for internal and external clients.

- Implemented IaC automation using Terraform.

- Participated in pre-sales technical architecture and received Innovation Award.

Technologies: IBM Cloud, Terraform, DevOps Toolchain.

Auxiliary Student - Tech Team

2016 – 2019

GITEI Research Group

- Supported development of digital applications using web and mobile technologies.

Auxiliary Student - Administrative Team

2015 – 2016

GITEI Research Group

- Assisted with project documentation, planning, and delivery.

—

Education

Electrical Engineering

Universidad Nacional de Colombia (2015 – 2019)
